

Evaluation Tools

Tracking Reports – These reports provide information about student activity in the course.

Performance Dashboard – This tool provides an up-to-date report on the activity for all students.

Early Warning System – This rule-driven tool sends an email message to students when the criteria for a pre-determined rule is not met. Rules may be based on test score, due date, or course access. Notification messages are customizable and a notification log is created for each student who receives an Early Warning message.

Pool Manager – the Pool Manager serves as a repository for test questions so that they can be stored for repeated use.

Test/Survey Manager – Tests/Surveys can be created, exported, edited, or deleted from this area.

Assignment Manager – Assignments automatically add a column to the Grade Center for each student. Instructors may easily access assignments and provide feedback through the Grade Center.

Turnitin Assignment Manager – Assignments created using Turnitin are compared against a database composed of millions of articles, books, Internet sites, and previously submitted student papers in an effort to combat plagiarism.
