

Technology in Education: This award honors a faculty member's innovative and effective use of technology as a tool in the teaching and learning process, through means such as web-related instruction, interactive audio or video, and new computer applications. (A stipend of \$3,000 accompanies this award.) The following criteria will be used:

- Innovation: The nominee has invented or successfully implemented new technology or devised new and innovative applications for older technology as a tool in the teaching and learning process.
- Effectiveness: The use of technology is demonstrated to go beyond skill and drill applications to promote higher order learning, for example through inquiry-based teaching that emphasizes critical thinking and problem solving skills.
