61 Campaign Ideas Target Your Advising Efforts Across the Year

A targeted advising campaign is an effort of focused, proactive outreach to a population of students in need of a specific intervention or action. Over the past year, academic advisors in the Student Success Collaborative have used the SSC platform to conduct a wide range of campaigns—seeing impressive results with students. Below is a list of 61 campaign ideas from advisors across the country.

STUDENT POPULATIONS

Immediate Performance Concern

These students are currently failing courses, missing milestones, or struggling to remain academically eligible. They are at-risk in the most traditional sense and unlikely to persist without immediate support.

Future Performance Concern

Although these students appear to be performing adequately, SSC data suggests that they are likely to struggle or encounter roadblocks in future terms. Intervening with these students now will help prevent trouble down the road.

Program Choice Concern

These students are enrolled in a major that is a poor fit for them based on their academic performance, or remain undeclared past the recommended credit threshold. A proactive advising conversation could help put these students back on the right path.

Progress Concern

Students in this population might be performing well academically, but are making slower than recommended progress to graduation, potentially adding cost or reducing their likelihood of completing at all. This population includes students who have stopped out, or whose credit accumulation has slowed.

Student Experience Concern

Students in this population are high performing, but may benefit from an encouraging message or engagement opportunity like a scholarship or internship to deepen their relationship with the institution and get more out of the college experience.

ADVISOR ACTIONS
