Grants Workshops for Faculty  
Fresno State - Division of Research & Graduate Studies  
Research & Sponsored Programs  
Spring 2017

Please join us for a grants workshop or two this year! Workshops are geared for every level of experience - from novices to experts looking for new opportunities or insights. Workshops incorporate the technical and strategic advice gleaned from Division of Research & Graduate Studies' experience of submitting over 500 proposals annually, which resulted in \$42M in award dollars last year.

***Getting Started with Grants or Contracts.*** For those new to applying for grants or contracts at Fresno State, this workshop covers strategies for identifying funders and developing proposal ideas, RSP and Foundation post-award services, institutional approval processes.

***Private Foundation Opportunities and Arts & Humanities Agencies.*** Explains how to find private foundation funding for a wide range of disciplines, and federal opportunities in the Arts and Humanities.

***How to Develop Budgets.*** RSP managers are equipped to develop a wide array of grants and contracts project budgets. This workshop covers the variety of budget formats that may be requested by funding agencies, and describes what you do (and do not) need to be prepared to discuss with them, as they help develop your proposed budget.

***H.S.I. Education Grant (USDA).*** The USDA Hispanic Serving Institution Education Grant supports training activities that will attract outstanding students and produce graduates capable of enhancing the USDA's workforce and Mission. This workshop will help faculty think about how their research training efforts could be aligned with USDA and H.S.I. Education Grant priorities and needs.

***National Science Foundation (NSF) and Research at Undergraduate Institutions (RUI).*** This workshop will cover NSF organization, strategies for finding opportunities, and NSF's "Broader Impacts" criteria and examples of activities, particularly in regards to Fresno State RUI projects.

***NSF Faculty Early Career Development Program (CAREER).*** These prestigious NSF awards support junior faculty who exemplify the role of teacher-scholars through outstanding research, excellent education and the integration of education and research within the context of the mission of their organizations. Projects build a firm foundation for a lifetime of leadership in integrating education and research. This workshop will address the special requirements of this special program, and highlight Fresno State's new award!

***Agricultural Research Institute (CSU ARI).*** The Jordan College of Agricultural Sciences and Technology will provide workshop/s on these CSU funding opportunities and the application process.

***Advanced Budgeting.*** Faculty should come to this workshop with a specific project of theirs in mind. Close hands-on instruction about how pre-award can help budget your proposals and post-award helps you make the most of your award.
