

MINUTES FACILITIES & CAMPUS ENVIRONMENT LIAISON
COMMITTEE
CALIFORNIA STATE UNIVERSITY, FRESNO
5240 North Jackson, M/S UC 43
Fresno, California 93740-8023

Office of the Academic Senate

Ext. 8-2743

March 7, 2007

Members Present: J. Kus, (Chair), R. Boyd, D. Nef, G. Wilson,
K. McDonald (Student).

Members Absent: C. Edmondson, J. Henson, K. Johnson,
L. Williams.

Visitors: None.

The meeting was called to order by Chair Kus at 2:20 p.m. in the University Center, Room #203.

1. Minutes: MSC to approve the Minutes 2/07/2007.
2. Agenda: MSC to approve the Agenda as distributed.
3. Communications and Announcements.
 - a. There was a general discussion of recent problems related to events at the Save Mart Center, particularly those related to an early evening professional wrestling show and an early morning inspirational speaker. Both events involved attendees arriving at a time when normal campus traffic was at it heaviest. Neither event was widely publicized on campus and traffic management was overwhelmed on both occasions.
 - b. The committee talked about the Chestnut Avenue widening project. It was noted that completion is now scheduled for October.
4. Update on Campus Construction Projects.
 - a. There was discussion about the proposed location of the University High School, which is now to be located on the eastern portion of parking Lot Q, north of Barstow. Various concerns were raised, especially related to farm operations and utilities.

- b. R. Boyd briefly updated the committee regarding a discussion that took place at the recent Campus Planning Committee meeting about proposed parking structures. K. McDonald noted that he had heard the presentation by D. Moll at an Associated Students meeting. In order to build two structures (one north of the North Gym and the other on a portion of Lot J), parking revenues will need to be increased.
- c. R. Boyd and G. Wilson talked about the sequence of construction for the photovoltaic project in Lot V (northwest corner of Shaw and Woodrow). The initial work, to begin shortly, will add about 140 spaces to the lot. Successive phases of the project will add solar panels to the lot. Work should be completed by the end of August.
- d. R. Boyd noted that a new fence surrounds Lot G (northeast corner of Cedar and Shaw) which increases security in that lot. There are plans to further close off the lot and restrict access only to the road on the north side of the lot (that road will also be repaved as part of the project).
- e. Work on the new locker room building for the tennis team will start this summer. The building will be located just west of the existing small restroom building on the south side of the tennis courts.
- f. The visiting team locker room/dugout for the softball complex will be remodeled over the summer. A similar project will take place at Biden Field.
- g. The International Center for Water Technology (ICWT) building (southwest corner of Barstow/Chestnut) is almost finished. Ribbon cutting should take place by the end of the month.
- h. The Thomas restroom ADA project should be finished shortly; only minor landscaping, access, and painting work needs to be done.
- i. There have been some delays in the library project caused by the need to add more steel to the structure than originally planned. The delay should be no more than two months. Completion is still scheduled for the end of 2008.

MSC to adjourn at 2:56 p.m.

The next meeting of FACEL will be Wednesday, April 11, 2007 at 2:00 p.m. in the University Center, Room #203. An agenda will be distributed by 3/2/2007.
