

CSU Fresno is implementing a new system for chemical inventory management called **UC Chemicals**.

## Some benefits of UC Chemicals include:

### Track and Maintain

Easy tracking and maintenance of containers using a barcoding system.

### Go Mobile

Available for iOS or Android.

### Compliance Reporting

Quickly generate required reports.

### Safety Info

Populates chemical details and safety information, such as hazards, health and storage handling and first aid information.

### Desktop Features

The complementary desktop platform provides additional features like chemical substructure search and automated reconciliation.

### Barcode Scanning

Use the app's barcode scanning capabilities to manage or share inventory.
