

Create an application or an online notification system similar to WAZE to provide traffic updates, construction updates, emergencies or routine events taking place on campus.

CURRENT CHALLENGE:

Currently there is no one centralized information that provides information to faculty, staff and students for either routine notifications, or alerts.

PROPOSED SOLUTION:

Create an application or an online notification system that is similar to WAZE that would provide traffic updates, construction updates, emergencies or routine events taking place that might affect anyone on campus.

BENEFITS TO FRESNO STATE:

Provides a routine means of communication that is able to reach all faculty, students, staff that is not dependent upon being at a computer or in an office, like our grounds workers and custodial staff.
