

Develop an app to inform students a location for leftover food at events and give them 10 minutes before catering picks it up

CURRENT CHALLENGE:

Wasted food at events :(

PROPOSED SOLUTION:

I propose an app that will inform students the location and give them 10 minutes to come and grab the extra food before catering picks up.

BENEFITS TO FRESNO STATE:

Feeds hungry students, eliminates food waste and give students a good feeling about events that are happening and how the event was advertised. Hopefully they will also learn where to look for events and maybe it will encourage them to actually attend more of them.
