

Collaborate with other CSU campuses and start doing regional outreach throughout CA.

CURRENT CHALLENGE:

From an outsiders perspective (New on Campus):

Challenge 1: FSU lacks many robust and intense programs that can better meet and serve our state and regional demands/economy. Several industries have evolved rapidly creating a vacuum for highly technical and professional degrees. Unfortunately, over the last two-decades FSU has not kept on pace, according to many Industry leaders.

PROPOSED SOLUTION:

Regional Outreach throughout CA. Listen to industry leaders....what are their concerns or future requirements of students? Collaborate with other CSU campuses, specifically Cal Poly. Partner with a UC campus that shares the vision of FSU.

We have to reevaluate many of our programs and adjust or supplement them accordingly. Create new programs if necessary.

Lastly, faculty and staff must be passionate about making a positive difference for the next generations to come. It is our moral responsibility and obligation as a community.

BENEFITS TO FRESNO STATE:

My solution could have multiple benefits. FSU could be a highly sought out campus nation wide and highly sought out graduates as well. We have the potential to compete with many Ivy League schools. Our community and our valley would also benefit. And most importantly, our students would benefit the greatest. And doing so, they would likely become model citizens and contributors.
