

Unlocking Mysteries

It's the stuff of TV crime drama: science ... intrigue ... mystery. You can find them all in Fresno State's new master's degree program in forensic science, which gives real-world crimebusters the tools to crack the case.

Dr. Kevin Miller, director of the university's Human Identification Lab, guides students in small class settings as they consult with practicing forensic scientists and professors who have authored internationally recognized research.

As the only program of its kind in the Valley, we're helping to meet the needs of a rapidly growing profession. At Fresno State, we're constantly seeking new ways to serve our region. That's no mystery.
