Recent Publishes Tab

You can display the recent publishes log by clicking on the recent publishes button in the content tab. This page will display the recent publishes to editable pages. A user can navigate to older published pages using the First, Previous, Next, or Last links at the top of the report. Information available includes the date and time of the publish, the file path, the user who made the change, the publish method, and a link to view a more detailed log of publishes of any particular page on the list. You are able to sort recent publishes by date ascending or descending (default). You are also able to scroll through the whole list of recent publishes by using the previous/next and first/last links.
