

Roles and Groups

There are several authority levels having different functionality in OU Campus. At Fresno State Level 6 and Level 8 are the most widely used levels. Level 6 is for Content Editors and Level 8 is for more advanced Site Administrators. Depending on the level of access assigned to you, some functions may or may not be available. The differences between the two are: Level 6 Content Editors cannot move, rename, copy or delete images, documents, or folders nor can they assign editing rights. Customizable roles will be available in the near future.

When a user is created they are associated with a group that is typically the college or division the site belongs to. Groups are only assigned to their respective college or division webpages. Users will not be able to modify any webpages they do not have authority to access.
