## THE STORYTELLER KNOWS ME

A Peace Corps volunteer or perhaps it was an anthropologist in Africa was in a village when satellite T.V made it's debut there. For a period of time, normal village life came to a halt as people watched (slack jawed I imagine) Then slowly, things began to return to some semblance of normality. When asked why people were not watching as much t.v. a villager replied, "We have our storyteller." " I understand said the volunteer, "but your storyteller knows a hundred stories- the television knows thousands of stories." With a gleam in his eye, the man quickly responded. "That is true, but the storyteller knows me!"
