BS in Civil Engineering, B.S.
MS in Civil Engineering, M.S.
MS in Civil Engineering-Water Resources & Environmental Engineering Option, M.S.
BS in Geomatics Engineering, B.S.

Civil Engineering

Civil Engineering
Dr. C. Choo, Program Coordinator

Civil engineering includes the research, development, planning, design, construction, and maintenance associated with urban development, water supply, structures, energy generation and transmission, water treatment and disposal, and transportation systems. The civil engineer deals with the function and safety of such public facilities as buildings, bridges, dams, pipelines, powerplants, highways, and harbors, and is concerned with the protection of the public against natural hazards of earthquakes, floods, landslides, and fires.

The graduate curriculum leading to an M.S. in Civil Engineering provides specialized training in the fields of structural engineering and applied mechanics, soil mechanics and foundation engineering, environmental engineering, water resources engineering, highway engineering, and geomatics engineering.

Mission of Civil Engineering

The Civil Engineering Program at California State University, Fresno strives to provide the high-quality education required for students to fully develop their professional qualities and skills as civil engineers in diverse environments and to develop their personal potential to the greatest extent possible to serve society.

The Civil Engineering Program's Educational Objectives

Graduates of the Civil Engineering Program are expected to exhibit the following:

- **Technical Aptitude**: Be employed as engineers with the ability to use their technical knowledge, design, and problem-solving skills for effective professional practice throughout their careers;
- **Life-Long Development**: Exercise capabilities for life-long learning as a means to enhance their technical and professional skills to continuously enrich themselves and benefit the communities they are serving and beyond;
- **Collaborative Spirit**: Develop interpersonal and collaborative skills that function well among a diverse group of professionals for a productive career; and
- **Professional Advancement**: Advance and support the engineering profession through participation of the professional societies, civic groups, and educational institutions and/or establish a distinctive record of professional achievements.

Geomatics Engineering

Geomatics Engineering
Dr. R. Munjy, Program Coordinator

Geomatics engineers manage the global spatial infrastructure. This effort includes real property boundary determination, digital mapping, Geographic Information Systems (GIS), Global Positioning Systems (GPS), remote sensing, photogrammetric mapping, applications programming, project management, and construction layout activities. Students use a wide selection of specialized equipment while acquiring a solid theoretical background. Integration of geomatics engineering design concepts spans a sequence of courses throughout the curriculum. Intensive design coursework during the senior year provides a culminating focus. Coursework containing design components includes the following: Computer-Aided Mapping (GME 66)
Mission of Geomatics Engineering

The mission of the Geomatics Engineering Program is to provide an educational experience that enriches the lives of students. The program teaches necessary discipline related knowledge and skills to prepare students for their profession. Students learn how to protect the health and welfare of the public while expanding their base of knowledge through research and scholarship.

Educational Objectives of the Instructional Program

1. The graduates of the Geomatics Engineering (GME) program should demonstrate competency in one or more of the following GME competency areas: boundary/land surveying, photogrammetry, geodesy, GIS, and digital mapping.
2. The graduates of the GME program should demonstrate continued capacity for employment in one or more GME specialty area.
3. The graduates of the GME program shall demonstrate capacity for graduate education.
4. The graduates of the GME program shall demonstrate continued membership in professional organizations.
5. The graduates of the GME program shall demonstrate a continuing commitment to lifelong learning.
6. The graduates of the GME program shall demonstrate a continuing commitment to serving and protecting the health and welfare of the public.
7. The graduates of the GME program shall demonstrate an ability to pass professional licensing or certification examinations after achieving requisite professional experience.

REQUIREMENTS

Bachelor of Science Degree Requirements

Geomatics Engineering Major

Major requirements (68 units)
GME 1, 15, 15L, 16, 16L, 34, 40, 50, 61, 66, 102, 108, 123, 125, 126, 135, 143, 159, 173, 180, 181 (54 units)
CE 150, 161 (5 units)

Technical Courses (9 units)
Select mandatory technical courses from the following list subject to the Design Courses statement listed below: GME 114, 145, 152, 153, 161, 174, 175, 190, 191T; CSCI 115, 124, 150, 172; CM 180B(formerly 114), 122, 124; BA 154; GEOG 181; FIN 180, 181; MATH 101, 121; PHYS 110

Design Courses: At least 6 units of technical courses must be selected from the following design courses: GME 145, 153, 161, 175

Other requirements (56 units)

General Education
Select one course from each of the G.E. areas: Area A1, A2, B1, B2, D1, D2, D3. (See G.E. listings.)

The following courses are required to satisfy both G.E. and major requirements: MATH 75 [B4], EES 1 [B1], PHIL 1 or 10 [C2], GME 151 [IB], PHIL 120 [IC], PLSI 120 [M/I]

Additional requirements
MATH 76, 77; PHYS 4A, 4AL, 4B, 4C

Total (124 units)

Note: Engineering majors are exempt from G.E. Area A3, third course Area C, Area E, and Area ID.

Advising Notes

1. Courses in engineering, mathematics, the physical sciences, and mandatory technical courses taken CR/NC are not counted toward fulfillment of degree requirements in geomatics engineering.
2. All geomatics engineering students must consult with their academic advisers at least once each year.
3. The Upper-Division Writing Skills requirement can be met by passing the university examination or by completing a "W" course with a letter grade of C or better no sooner than the term in which 60 units of coursework are completed.
4. All upper-division engineering courses should be completed with an average grade of at least a C.

**FACULTY**

For faculty phone numbers and e-mail, see the campus directory.

For more on the faculty, see the Civil Engineering faculty pages and the Geomatics faculty pages. The faculty pages are updated by the department or program.
