Civil Engineering-Water Resources & Environmental Engineering Option, M.S.

DEPARTMENT

BS in Civil Engineering, B.S.
MS in Civil Engineering, M.S.
MS in Civil Engineering-Water Resources & Environmental Engineering Option, M.S.
BS in Geomatics Engineering, B.S.

REQUIREMENTS

Mission. Located in California’s Central Valley, the M.S. in Civil Engineering (MSCE) Program offers a graduate program of excellence that provides opportunities for advanced education and research in civil and geomatics engineering. The program’s mission is to offer a curriculum that combines preparation for professional practice as well as preparation for research and further advanced studies.

Admission. The requirements for graduate admission to California State University, Fresno must be met. Graduate Record Examination (GRE) scores must be received by the application deadline for International Student applicants and within 30 days after the application deadline for Domestic Student applicants. The minimum score considered passing on the quantitative section is 146 (new scale) / 550 (old scale). Also, applicants should possess a bachelor’s degree in civil engineering, geomatics engineering, or a related field from an institution accredited by the Accreditation Board for Engineering and Technology and must have a 3.0 grade point average in the last 60 semester-units of engineering courses attempted, on the basis of 4.0 being A, or the approval of the Graduate Committee of the Department of Civil and Geomatics Engineering. If an applicant’s preparation is deemed insufficient by the Graduate Committee of the Department of Civil and Geomatics Engineering, the applicant is required to take additional courses which are specified in writing to remove the deficiency. Such courses, taken as an unclassified student, are in addition to the minimum of 30 semester hours credit for the master’s degree in engineering.

The department graduate program coordinator shall appoint an interim graduate adviser for each student when that student is accepted into the graduate program. The coordinator will take into account student interests and correlated faculty interests when making this appointment.

Continuation in the Program. Students should select a graduate adviser before completing 12 units of graduate study and advancing to candidacy. Other members of his or her graduate committee shall be selected in consultation with the graduate adviser if the student has selected Plan A. This committee shall consist of a total of three members, two of whom must be tenure/tenure track faculty. The graduate student shall notify the department’s Graduate Committee with a letter signed by both the student and the graduate adviser of the membership of the student’s Graduate Committee. This letter shall be placed in the student’s academic folder.

A graduate student may change graduate advisers but such change must be approved by the department’s Graduate Committee. The student, together with his or her new graduate adviser, completes a contract program within his or her first semester of coursework taken for graduate credit. This program must be approved by the department’s Graduate Committee.

A student must pass CE 210 with a grade of B or higher and satisfactorily complete a written examination (typically administered in CE 210) before being eligible for Advancement to Candidacy; this satisfies both the university’s graduate writing requirement and demonstrates the student has sufficient technical proficiency to continue in the program.

Any semester for which the grade point average falls below 3.0 shall result in placing the affected graduate student on probation. A second offense shall lead to disqualification. For additional information, please refer to the Division of Research and Graduate Studies, Administrative Academic Probation, Academic Disqualification.

The M.S. in Civil Engineering requires the completion of 30 units following one of three programs of study.
Water Resources and Environmental Engineering (WREE) Option

Plan A (Thesis)
a. 200-series CE courses, including CE 210, 242 and two from: CE 205, 240, 241, and 247 (see note 1) (12-21 units)
b. 100-series CE or GME technical area courses (see note 2) (0-6 units)
c. Courses outside the department (see note 3) (3-6 units)
d. CE 299 Thesis (6 units)
Total (30 units)

Plan B (Project)
a. 200-series CE courses, including CE 210, 242 and two from: CE 205, 240, 241, and 247 (see note 1) (15-24 units)
b. 100-series CE or GME technical area courses (see note 2) (0-6 units)
c. Courses outside the department (see note 3) (3-6 units)
d. CE 298 Project (3 units)
Total (30 units)

Plan C (Comprehensive Exam)
a. 200-series CE courses, including CE 210, 242 and two from: CE 205, 240, 241, and 247 (see note 1) (18-27 units)
b. 100-series CE or GME technical area courses (see note 2) (0-6 units)
c. Courses outside the department (see note 3) (3-6 units)
d. Comprehensive Exam (0 units)
Total (30 units)

Advising Notes
2. 100-series technical area courses in civil and geomatics engineering -- select from CE 141, 144, 145, 146, 190 and 191T. A minimum grade of B is required. Similar courses previously taken and counted towards another degree are excluded.
3. Select at least one 100-series and 200-series course outside civil and geomatics engineering in a discipline (or disciplines) that are best suited to the student's graduate program. These typically include mathematics, statistics, management, business, geology, physics, chemistry, health science, and biology. All courses must be approved by the supervising faculty and Graduate Program Coordinator. A minimum grade of B is required for 100-series courses. Similar courses previously taken and counted towards another degree are excluded.

FACULTY

For faculty phone numbers and e-mail, see the campus directory.

For more on the faculty, see the Civil Engineering faculty pages and the Geomatics faculty pages. The faculty pages are updated by the department or program.
