**Program Description.** The Single Subject Credential authorizes the holder to teach in the subject area specified on the credential in departmentalized classrooms commonly found at middle schools, high schools, and adult educational settings. The Kremen School of Education and Human Development offers the Preliminary Single Subject Credential in cooperation with various academic departments. The cooperating departments are responsible for developing subject matter competency; the Kremen School of Education and Human Development is primarily responsible for developing professional education competency.

The Single Subject coordinator provides general advisement for Single Subject Credential candidates. Area advisors (see list) provide academic advisement for credential candidates majoring in their respective departments, teach methods courses in their subject fields, assign and supervise student teachers, and act as official liaisons between the subject matter departments and the Single Subject coordinator. Advisors may be contacted through the Kremen School of Education and Human Development’s Advising Center.

Students may earn two types of credentials through the Kremen School of Education and Human Development:

- Preliminary Single Subject Credential
