MN in Psychology, Minor
BA in Psychology, B.A.
MA in Psychology, M.A.
EDS in Psychology, Ed.S.
MA in Applied Behavior Analysis, M.A.
Courses Offered

Psychology is the scientific study of behavior -- including human thought, emotion, and action -- and the application of scientific knowledge to the solution of real-world problems. It includes a wide variety of topics, including perception, learning, memory, thinking, emotion, personality, social interaction, development, and abnormal behavior. Psychologists recognize that understanding behavior in all its complexity requires studying it from multiple perspectives. A thorough understanding of memory, for example, requires knowledge ranging from the neural structures and processes that underlie it to the social and cultural forces that influence it.

Students majoring in psychology take core courses in general psychology, statistics, and research methodology, along with additional courses in each of the primary areas of the discipline. There are also numerous opportunities for students to supplement their coursework with hands-on experience in faculty research labs and in the field under faculty supervision. Advanced and well-qualified students can participate in our senior honors program. These students design, conduct, and present an original research project as a senior thesis.

Psychology majors learn to think critically, write and speak clearly, identify and solve problems, and work effectively both individually and in groups. As a result, the study of psychology provides excellent preparation for graduate study and careers in a variety of fields.

REQUIREMENTS

Master of Arts Requirements

The Master of Arts degree program in psychology may be arranged to include interest areas such as general experimental, developmental, and social psychology, as well as special master of arts programs for individuals. This 30-unit degree program is intended primarily to prepare graduates for entry into doctoral programs in general experimental, developmental, social, or clinical psychology, and may serve as preparation for community college teaching or professional employment requiring a master's degree.

Minimum Course Requirements for the M.A.

Core

PSYCH 244A (4 units)
PSYCH 244B (1 unit)
PSYCH 201 (1 unit)
PSYCH 202 (1 unit)
PSYCH 200T or 205 or 250T or 255T (one course) (3 units)
PSYCH 220T or 225T (one course) (3 units)
PSYCH 299 (Thesis) (3 units)
Total (16 units)

Electives

Must include two additional courses in psychology or a related field; maximum of 6 units independent study. Program must be approved by graduate advisor (14 units)

Total (30 units)

Graduate Programs

The Master of Arts in Psychology, Master of Arts in Applied Behavior Analysis, and Educational Specialist degrees in Psychology are designed to provide students with a broad background in psychology while allowing them opportunities to pursue areas of special interest. Completion of the requirements for all master's degrees prepares students for positions in community mental health service agencies, school settings, community college teaching, research, or entry into Ph.D. or Psy.D. programs in Psychology.

Admission to Master of Arts in Psychology, Master of Arts in Applied Behavior Analysis, and Educational Specialist degrees is based upon the satisfactory completion of prerequisite courses selected from the core courses required for the California State University, Fresno undergraduate major in psychology, or their equivalent. Potential graduate students should submit transcripts of all academic work and three letters of recommendation. In addition, students must submit scores from the GRE general test to be considered for admission. School Psychology program applicants must submit scores from the CBEST as well and complete other prerequisites as outlined in the department's application. All students must submit applications to both the Division of Graduate Admissions and the Department of Psychology.

Admission to the graduate program in psychology is based on the evaluation of a student's capacity to successfully complete master's level work. The graduate committee uses multiple criteria to assess an applicant's qualifications including coursework completed, grades, test scores, essays, and letters of recommendation. In addition, an applicant's professional interests and goals are evaluated in terms of the interests of the faculty and the resources of the Department of Psychology. Separate evaluations of applicants are made for the M.A. general/experimental program, the M.A. in Applied Behavior Analysis program, and the Ed.S. School Psychology program. Although many applicants meet our minimum admission requirements, we are limited in the number of positions available and many qualified applicants cannot be offered admission.

Admission to classified graduate standing requires a minimum undergraduate grade point average of 3.0, as well as a minimum grade point average of 3.0 in undergraduate psychology courses. A combined score of at the 50th percentile or higher on the Verbal and Quantitative sections of the GRE General Test is preferred. Applicants lacking minimum scores in one area with compensating strengths in other areas may apply. The Department of Psychology does not typically admit unclassified students into the graduate program.

In order to apply for advancement to candidacy, students in psychology graduate programs must earn grades of A or B in PSYCH 244 and pass the Psychology Department Graduate Writing Requirement and the Psychology Department Statistical Proficiency Exam.

The graduate writing requirement can be fulfilled in PSYCH 244A. Further information can be found in the course syllabus and graduate handbook.

Under the direction of a graduate advisor, a coherent program is prepared and submitted, directed toward the achievement of the student's goal in graduate study.

FACULTY

All full-time faculty members in the department have a Ph.D. in psychology or a closely related field. Their areas of expertise represent the breadth of contemporary scientific psychology. In addition to being dedicated teachers, most faculty members also conduct and publish original research. Many are also licensed or certified as practitioners of clinical psychology, school psychology, or applied behavior analysis.

For faculty phone numbers and e-mail, see the campus directory.

For more on the faculty, see the faculty pages.

The faculty pages are updated by the department or program.
