Dan Taylor

Lights, Camera, Fastball:
How the Hollywood Stars Changed Baseball

SEPTEMBER 22 | Wednesday | 1 - 2:30 p.m.

Author Dan Taylor will talk about the basis of his book, the Hollywood Stars and their glorious 20-year run in the Pacific Coast League. Led by Bob Cobb, owner of the heralded Brown Derby restaurant and known more famously as the creator of the Cobb salad, the Hollywood Stars took professional baseball to a new and innovative level. The team played in short pants, employed cheerleaders and movie-star beauty queens, pioneered baseball on television, and offered fans palatable delicacies not before served at ballparks. Its celebrity owners pushed boundaries, challenged existing baseball norms, infuriated rivals, and produced an imaginative product, the likes of which the game had never before seen.

Anthony Iton
M.D., J.D., MPH
Senior Vice President of the California Endowment

When It Comes to Your Health, Does Your Zip Code Matter More Than Your Genetic Code?

SEPTEMBER 30 | Thursday | 1 - 2:30 p.m.

In 2013 when Forbes magazine listed the top ten healthcare quotes for 2013, the number one quote was attributed to Dr. Iton: "When it comes to health, your zip code matters more than your genetic code." This presentation will address some of the data and evidence behind that quote by exploring the strength of the relationship between life expectancy and neighborhood. Using hundreds of thousands of death certificates, GIS mapping and other simple data analyses, a profile of life expectancy by neighborhood in seven different cities and regions will be presented. The implications for US health spending and population health management will be discussed and a model for understanding the social determinants of health will be presented.

In this class, we’ll explore some of the greatest scientific discoveries of yesteryear, complete with contextualization: what was science like before the experiments were conducted, and how were they conceptualized? We’ll tour various fields of science and hundreds of years of discoveries in an attempt to look at the evolution of science the way the scientific pioneers had to: ab initio.

Why Monsters?
TUESDAY | Nov. 2
10 - 11:30 a.m.

Presenter: Dr. Diane Facinelli
We live in a time of monsters. Our ancient ancestors lived in a time of monsters. The monsters themselves change as cultures and our fears, anxieties, and lessons change, but there are always monsters lurking in the margins: unnatural creatures who invade the natural world and destroy our sense of security no matter what seemingly secure place we inhabit. If they frighten us so much, why are they so fascinating? Looking at several monsters from ancient Greece to the present reveals some of the reasons—and benefits—behind the monsters our imaginations create.

"The mission of women is to be beautiful and to bring children into the world." By examining both the general situation of women in Nazi Germany and the individual lives of wives and girlfriends of the Nazi elite, such as Magda Goebbels, Emmi Goering, Leni Riefenstahl, and the infamous Eva Braun, German Historian Anette Isaacs will reveal in how far this lofty expectation was met by reality in a racially motivated totalitarian system.

**10 - 11:30 a.m.**

**Presenter: Dr. Kirstin Hendrickson**  
As vaccine-preventable illnesses disappear from the public eye and a new generation of parents begins to make health choices for their children, nebulous fears about “toxins” in vaccines loom large. Having gained momentum for more than a decade, vaccine refusal is resulting in increasing rates of once-rare diseases in the U.S., and impacting in real time our ability to return to normalcy post-COVID. The modern anti-vaccine movement is by no means the first of its kind; people have feared and revered vaccines in cycles since the development of the modern inoculation by Edward Jenner. How were vaccines developed, and what’s in them? What’s behind the modern anti-vaccine movement? Finally, are vaccine decisions personal, or matters of public health, and why?
Germany and Israel - A Story of Guilt and Unlikely Friendship!
TUESDAY | Nov. 9
3 - 4:30 p.m.

Presenter: Anette Isaacs
Five and half decades ago, Germany and Israel reluctantly entered into diplomatic relations. What at first glance seems to be a rather unlikely relationship -- especially in light of the shared history-- has evolved over time into a blossoming friendship and successful economic bond. In order for this to happen Germany had to face its Nazi legacy and subsequent collective guilt. Join German Historian Anette Isaacs on this 83rd anniversary of the Night of Broken Glass (1938) as she discusses how her native country has attempted to cope with the guilt of causing the Holocaust and how this painful but necessary process heralded a new era in German- Israeli relations.

Sawmills in Eastern Fresno County
1860s-1890s
TUESDAYS | Nov. 9, 16
1:30 - 3 p.m.

Presenter: Dr. Jeannine Raymond
Dive into a period of Fresno County history when Sierra timber was felled in response to the population boom of the late 1800s, and the railroad’s need for lumber. Meet the people at the center of the sawmill activity. Learn how they moved giant logs. Get a glimpse of life as a timber man, and what the women and children did to avoid the snowy winters.

The Political and Social Uses of the Arthurian Legend
TUESDAYS | Nov. 9, 16
10 - 11:30 a.m.

Presenter: Dr. Diane Facinelli
The significance of the legends surrounding King Arthur and the many knights and ladies of his court at Camelot have enchanted readers, listeners, and viewers for centuries. They also have been the source for political and social propaganda since the first mention of the legendary king in early chronicles. Among the topics in this class will be: What political commentaries on England’s state might be in Sir Thomas Malory’s collection of Arthurian tales, one of that nation’s first printed books? What social messages did Alfred, Lord Tennyson convey through alterations to the legend in his 19th-century Idylls of the King? What are some contemporary works and rituals that make the Arthurian legend relevant to modern Americans?

Independence Corrupted - How America’s Judges Really Make Their Decisions
THURSDAY | Nov. 18
1 - 3 p.m.

Presenter: Hon. Charles B. Schudson
Judge Schudson knows how judges really make their decisions. He brings us behind the bench to probe judicial minds analyzing actual trials and sentencings – of abortion protesters, murderers, sex predators, white supremacists and others. He takes us into chambers to hear judges forging appellate decisions about life and death, corporate crime, multimillion-dollar damages, and priceless civil rights. Most significantly, he exposes the financial, political, personal, and professional pressures threatening judicial integrity like never before.

NOTE: All in-person offerings are subject to change depending on public health guidelines and direction from the campus and the California State University.
BOOK CLUB

▶ FRIDAY, SEPTEMBER 3
The Burglary: The Discovery of J. Edgar Hoover’s Secret FBI
by Betty Medsger

The never-before-told full story of the history-changing break-in at the FBI office in Media, Pennsylvania, by a group of unlikely activists—quiet, ordinary, hardworking Americans—that made clear the shocking truth and confirmed what some had long suspected, that J. Edgar Hoover had created and was operating, in violation of the U.S. Constitution, his own shadow Bureau of Investigation.

▶ FRIDAY, OCTOBER 1
Leave Only Footprints
by Conor Knighton

In the wake of a failed romance, the author, a correspondent for the CBS program Sunday Morning, decides to do a series on America’s national parks in 2016, the 100th anniversary of the founding of the National Park Service. He begins on January 1 at Acadia National Park, the easternmost in the U.S., and by the time he ends on December 31 at Point Reyes National Seashore, he has visited and offered commentary and perspective on all the parks. What he finds is that the national parks are a reflection of America itself: all of its strengths and weaknesses, hopes, dreams, possibilities, unmet goals, and future challenges. He especially sees the national park system as symbolized in Theodore Roosevelt, who, in the wake of a personal tragedy, spent several years in the then wilderness of the Dakotas and reemerged a stronger and more resilient person. The author comes to realize that, like many others, the national park system is the best idea America has ever had and has become a model and beacon for the rest of the world.

▶ FRIDAY, NOVEMBER 5
The Premonition: A Pandemic Story
by Michael Lewis

Fortunately, we are still a nation of skeptics. Fortunately, there are those among us who study pandemics and are willing to look unflinchingly at worst-case scenarios. The author pits a band of medical visionaries against the wall of ignorance that was the official response of the Trump administration to the outbreak of COVID-19. The characters you will meet in these pages are as fascinating as they are unexpected. A 13-year-old girl’s science project on transmission of an airborne pathogen develops into a very grown-up model of disease control. A local public-health officer uses her worm’s-eye view to see what the CDC misses, and reveals great truths about American society. A secret team of dissenting doctors, nicknamed the Wolverines, has everything necessary to fight the pandemic: brilliant backgrounds, world-class labs, prior experience with the pandemic scares of bird flu and swine flu...everything, that is, except official permission to implement their work.

▶ FRIDAY, DECEMBER 3
West of the West Dreamers, Believers, Builders, and Killers in the Golden State
by Mark Arax

Mark Arax combines journalism, essay, and memoir to capture social upheaval as well as the sense of being rooted in a community in this book. Piece by piece, the stories become a whole, a stunning panorama of California, and America, in a new century. “The Summer of the Death of Hilario Guzman” has been praised as a “stunningly intimate” portrait of one immigrant family from Oaxaca, through harrowing border crossings and brutal raisin harvests. In the “Home Front,” right-wing Christians and Jews form a strange pact that tries to silence debate on the War on Terror, and a conflicted father loses not one but two sons in Iraq. “The Last Okie in Lamont,” the inspiration for the town in the Grapes of Wrath, has but one Okie left, who tells Arax his life story as he drives to a funeral to bury one more Dust Bowl migrant. “The Highlands of Humboldt” is a journey to the marijuana growing capital of the U.S., where the old hippies are battling the new hippies over “pollution pot” and the local bank collects a mountain of cash each day, much of it redolent of cannabis.
