### Common Errors

Below you will find examples of errors most often encountered by students while registering for classes, including Enrollment Blocks and Learning Communities:

- a. Requisite not met

Sections in an Enrollment Block or LCOM cluster are requisite of each other. Concurrent enrollment in all three sections is required. This message indicates that only one section was submitted in the enrollment transaction.

- b. Time Conflict

The enrollment engine will check for time conflicts. This message indicated that the requested class, CHEM 1A, conflicts with class #77231 for which the student is currently enrolled.

- c. Class if full

Each class section has limited enrollment capacity. This message indicates that NSCI 4, class #74729, is full. Wait listing is an option for most classes.
