

Join EPA to learn about the EnviroAtlas tool and how it may be of use to you!

February 14, 2017

Presentation and demonstration of tools and resources

@ CSU Fresno

Room 9:45am-12 noon 3212 HML

1-3:30 290 IT

Representatives from EPA's Office of Research and Development will showcase openly available data for Fresno and the surrounding area.

Examples include:

- Walking distance to parks
- Tree cover along busy and walkable roads
- Commute modes and commute times
- Urban heat island mitigation

EnviroAtlas is a web-based collection of interactive tools and resources that provides data, research, and analysis on the relationships between nature, people, health, and the economy. EnviroAtlas users can access, view, and analyze diverse information to inform decision-making and research.
