

Fresno Math Circle

Grades 4-10

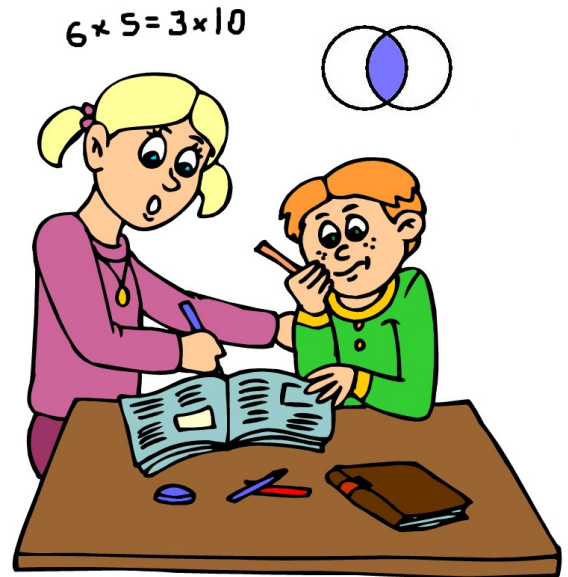

2017-18

What is Fresno Math Circle?

It is an enrichment program for children interested in mathematics. This year we have three groups meeting on Saturday mornings: grades 4-5, grades 6-7, and grades 8-10.

Why join Fresno Math Circle?

The purpose of the Fresno Math Circle is to expand children's understanding of mathematical concepts by introducing them to challenging problems. Students will have an opportunity to develop logic and reasoning skills while having fun with mathematics!

Who is it for?

The Fresno Math Circle is open to students in grades 4-10. If your child wants to learn advanced mathematics and is ready for some challenges, apply to the Fresno Math Circle at <http://www.fresnomathcircle.org/apply.html>. Space is limited, so apply soon!

When and Where?

The Fresno Math Circle meets every other Saturday starting September 9, 2017, from 10:00-11:30 AM, on the Fresno State campus. It is taught by mathematics faculty and assisted by Fresno State students. More information including the list of dates and locations, preview problems, and an application form can be found at
