Professional Skills Workshop

For Non-Academic Physics Careers

Steve Wilburn, Twin Prime Inc.
and
Doug Singleton, CSU Fresno

Professional Skills Workshop for non-academic physics careers

Abstract

Most physics careers are outside academia (*i.e.* industry, government labs, etc.). In this mini-workshop skills necessary to pursue a career are presented both from an outside perspective (Doug Singleton) and inside perspective (Steve Wilburn). Much of this presentation is based on a longer workshop put together by Dr. Crystal Bailly of APS national who we gratefully acknowledge. Bring your laptops to this talk.

3-4:30 p.m., Friday, January 27th ; McLane Hall 162
