California State University, Fresno

Summer Research by Fresno State Students

Abstract

Three Fresno State students -- Summer Al-Hamdani, Shoji Hishida, Boris Rudolfs III – will give short talks about their Summer 2017 research experiences. They will talk about (i) “Investigating the Fold-Switch Mechanism of the Cyanobacterial Biological Clock Protein KaiB” (Summer); (ii) “Testing the Cytotoxicity of Nanoparticle Microshells” (Shoji); (iii) “Computational Modeling of Multiple Kinesin-1 on Microtubule Bundles” (Boris). In addition to the science, each student will talk about the programs they applied to and will give advice on how to go about looking for and applying to summer research position.

3-4 p.m., Friday, Jan. 26th, McLane Hall 162. All are welcome!
Refreshments will be served at 3pm.
