

PHYSICS COLLOQUIUM

Bouakham Perez, Eric Madrigal,

Panel Discussion on Pathways for Careers in Physics Teaching

Abstract

This special physics colloquium is a panel discussion with current and future physics teachers! The panelists will give a brief overview of their pathway into teaching and will answer questions on teaching science in the area. Discussion will focus on practical advice for how to pursue a career in physics teaching. This colloquium is especially intended for current science or engineering students who are contemplating going into physics and science teaching, but will also provide excellent information for math majors hoping to teach both math and physics.

3:00-4:00 p.m., Friday, October 4th
