

MORE Power to You

More Do's and Don'ts For Power Tools:

DO:

- **Remove** damaged equipment from use immediately.
- **Use** three-prong grounding extension cords with all equipment requiring three-prong plugs.
- **Match** plugs with outlets.
- **Use** only specially approved tools for work in areas that are wet or contain flammable liquids.
- **Keep** body parts and clothes away from the point of operation and power train.

DON'T:

- **Don't** let cords drag on the floor.
- **Don't** use cords to raise or lower equipment.
- **Don't** fasten cords with staples, nails, or other means that could damage cord insulation.
- **Don't** plug or unplug equipment with wet hands.
- **Don't** handle a wet cord unless you're wearing insulating protective equipment.
