Student Outcomes Assessment Plan (SOAP)

I. Mission Statement

The Reading/Language Arts Program offers a Master of Arts Degree in Education with a Reading/Language Arts Option as well as a Reading/Language Arts Specialist Credential. The program is designed to prepare classroom teachers with a strong theoretical foundation on literacy development and the capacity to apply this knowledge in making assessment and instructional decisions to meet the diverse needs of students with varying language and cultural backgrounds.

II. Goals and Student Learning Outcomes

Goal 1: To prepare graduates to be knowledgeable about literacy development and instructional practices through the study of theoretical perspectives and scientific research on literacy processes and language development.

Outcomes: Graduates will be able to:

- 1.1 Compare and contrast major theories of literacy and language development
- 1.2 Apply theoretical perspectives and scientific research in the design and implementation of instructional lessons

Goal 2: To prepare graduates with the capacity to plan, implement, evaluate, and modify literacy instruction to meet the needs of diverse struggling readers and English Language Learners.

Outcomes: Graduates will be able to:

- 2.1 Design differentiated instructional strategies based on student assessment results.
- 2.2 Provide effective clinical literacy instruction to meet the needs of culturally and linguistically diverse struggling readers.

Goal 3: To prepare graduates to be knowledgeable and effective literacy leaders capable of mentoring colleagues in effective literacy instruction and evaluating educational intervention programs.

Outcomes: Graduates will be able to:

- 3.1 Demonstrate effective collegial mentoring in literacy instruction.
- 3.2 Evaluate school-wide and/or district-wide literacy program initiatives.

IV. Assessment Methods

Our program mission is to prepare classroom teachers with both a strong theoretical foundation on literacy development and the capacity to apply this knowledge in making assessment and instructional decisions to meet the diverse needs of students. As such, our assessment methods are structured to look at both knowledge acquisition and application.

The Matrix in the next section illustrates how each assessment tool measures the outcomes directly or indirectly. This section will describe the products that will be used to assess Student Learning Outcomes across the program.

Measure 1: *LEE 213 Theory to Practice Project.* (Outcomes 1.1, 1.2, 2.2)

In LEE 213-Teaching the Language Arts K-12, students complete an inquiry project that has three main components. First, students select a topic of inquiry driven by their professional experiences teaching language arts and write a research paper describing the different theoretical perspectives and respective instructional implications. Second, students use the research examined to develop and implement instructional lessons in the classroom setting. Third, students develop a presentation to share with colleagues that presents the theory of their report, the practical applications from their lessons, and a critical reflection on the experiences. Projects will be evaluated and scored using a rubric (attached) as exceeds expectations (90-100), meets basic expectations (80-89), or needs improvement (below 80) based on the ability to compare and contrast literacy theories and apply the theoretical perspectives in effectively designing literacy instruction that meets the needs of struggling readers and English Learners. A score of ≥ 80 is considered to have met the learning outcome. 75% of students are expected to meet the learning outcome.

Measure 2: *LEE 224 Case Study Report.* (Outcomes 2.1, 2.2)

In LEE 224-Assessing & Developing Reading Abilities, students administer a variety of literacy assessments to an individual struggling reader in K-12, analyze the assessment results, and use the results to develop an individualized instructional plan. The students prepare a case study report that details the assessment tools and results, provides an analysis of the results, and provides instructional recommendations. Reports will be evaluated and scored using a rubric (attached) as exceeds expectations (90-100), meets basic expectations (80-89), or needs improvement (below 80) based on the ability to administer, score, and analyze assessment tools and to use assessment results and literacy research to guide the design of differentiated instruction for struggling readers. A score of ≥ 80 is considered to have met the learning outcome. 75% of students are expected to meet the learning outcome.

Measure 3: *LEE 244 Literature Review Wiki Project* (Outcome 1.1)

In LEE 244-Research for Reading Professionals, students review research from the emergent reading, comprehension, and English Learner fields of literacy and construct a Wiki page. On this wiki page, students provide summaries of the research reviewed, including context, methods, and implications as well as a synthesis comparing the various theoretical perspectives that were examined. Wiki pages will be evaluated and scored using a rubric (attached) as craftsman (87-100), good (74-86), or satisfactory (below

74) based on the ability to summarize and synthesize research studies.

A score of ≥ 80 is considered to have met the learning outcome. 75% of students are expected to meet the learning outcome.

Measure 4: *Practicum Experience Matrix (LEE 230 & 234).* (Outcomes 1.2, 2.1, 2.2)

The Reading/Language Arts Master's option requires students to complete two supervised clinical field experiences. LEE 230 and LEE 234 provide students with in-depth experiences in diagnosing and tutoring K-Adult pupils who demonstrate reading achievement below expected performance for their respective age levels. LEE 230 requires students to conduct small-group tutoring; LEE 234 requires students to conduct individual tutoring. The matrix will be used to document students' competence in administering appropriate assessment measures and applying research-based instructional methods for meeting the needs of early readers, English Learners, and students with reading difficulties across these two clinical courses.

The completion of all competencies is considered to have met the learning outcomes. 75% of students are expected to meet the learning outcomes.

Measure 5: *LEE 254 Program Evaluation Report.* (Outcome 3.2)

In LEE 254-Supervised Field Experiences in Reading, students use evaluation tools and school data to construct an evaluation report of their school site's literacy program. In these reports, students provide analysis of data regarding school instructional procedures and curriculum materials, the strengths and weaknesses of these elements, and conclusions regarding program enhancement and professional development. Reports will be evaluated and scored using a rubric (attached) as excellent (90-105), fair (63-89), or poor (21-62) based on the ability to collect evaluation data, provide clear analysis that accurately reflects the data, summarize areas of strength/weakness, and draw conclusions for refinements supported by the research literature.

A score of ≥ 80 is considered to have met the learning outcome. 75% of students are expected to meet the learning outcome.

Measure 6: *LEE 254 Coaching Presentations.* (Outcome 3.1)

In LEE 254-Supervised Field Experiences in Reading, students collaborate with a colleague in 3 peer-coaching cycles, consisting of pre-consultation, observation/modeling, and debriefing consultation. The students prepare presentations for two of the cycles. Presentations include lessons learned about the coaching process, critical reflective insights about professional growth, and plans for future goals. Presentations will be evaluated and scored using a rubric (attached) as excellent (31-50), fair (11-30), or poor (≤ 10) based on ability to critically analyze coaching experiences and to reflectively assess professional growth.

A score of ≥ 31 is considered to have met the learning outcome. 75% of students are expected to meet the learning outcome.

Measure 7: *Comprehensive Exam.* (Outcomes 1.1, 2.1)

A comprehensive exam is one culminating experience option. To assess Outcome 1.1, the following exam question will be analyzed: *Identify four similarities and differences between Bottom-Up and Top-Down reading instruction. Be sure to make reference to research studies.* To assess Outcome 2.1, the following question will be analyzed: *Review the attached Running Record from a first grade student. Analyze the*

results and devise a brief instructional plan for the student. Exam questions will be evaluated and scored using a rubric (attached) as exemplary (4), accomplished (3), developing (2), or beginning (1). A mean score of ≥ 3 is considered to have met the learning outcome. 75% of students are expected to meet the learning outcome.

VII. Process for Closing the Loop

The Program Coordinator will be responsible for coordinating the collection of assessment data with the assistance of program faculty each semester. The Program Coordinator will be responsible for summarizing the data each semester. Near the end of each spring semester, a program meeting will be dedicated to reviewing assessment results, determining what changes, if any, the results suggest, and adjusting the next year's assessment activities as needed. The minutes of this meeting will provide the basis for the department chair's annual report on assessment activities.
