Included, works properly, connected to  
standard/concepts

↳ Strong links!

↳ Students could analyze  
Aminomiacs video for  
current data. (No Pluto...!)

### Presentation Style Elements: (15 points possible)

Animation, sound, digital images, backgrounds, color choices, font, etc. add to the quality of the presentation. Order of the slides and how the information is presented makes sense and helps the learner understand content and make connections. Developmentally appropriate for grade level standard selected. Students will be engaged in learning about the standard through this presentation.

- Thoughtful conceptual layout & design!
- Clear construction of content!
- Very fun Photo Booth application with intro to space!
- Note: You might want to change the graphic on the title page. The planets bunched together maybe confusing to the kids.
- Wonderful introduction to the solar system! The kids will really enjoy the fun format!

TOTAL POINTS: 100/100

\* May I use your project as a future role model?
