Build comprehensive Knowledge doing

Fractions

Grades 3, 4 & 5

Fractions are considered one of the most challenging concepts students need to learn in their early grades.

Developing deep knowledge of fractions and their operations will provide a solid foundation for all students to learn all other Mathematics.

This workshop is designed to develop and expand this understanding through hands-on activities and problem-solving that will enhance essential skills students need to become critical thinkers and successful math students.

Registration fee: \$150*

**Space is limited to 25 seats

*Fees include materials and handouts

For additional information, to register please go to:
