Program*

Learning to transform lives and communities....

Our Mission Statement

Women's Studies is an approach that places women in the center of inquiry. The primary mission of Women's Studies is to analyze how gender is constructed through a variety of social institutions and cultural processes so that gender inequality can be dismantled. Students acquire both a local and global perspective on gender. The program is interdisciplinary and multidisciplinary in its approach and thereby draws on a range of feminist theories, methodologies, and practices. Attentiveness to diversity, privilege and power, and women's unique creative contributions to human experience are central aspects of this training. More than simply a body of knowledge, Women's Studies encourages students to apply their learning to transform their lives and their communities.

Congratulations Class of 2009
