**III. Diversity Definitions**

- *Diversity*: Individual differences (e.g., personality, language, learning styles, and life experiences) and group/social differences (e.g., race/ethnicity, class, gender, gender identity, sexual orientation, sexual identity, country of origin, and ability status as well as cultural, political, religious, or other affiliations) that can be engaged in the service of learning.
- *Inclusion*: The active, intentional, and ongoing engagement with diversity—in people, in the curriculum, in the co-curriculum, and in communities (intellectual, social, cultural, geographical) with which individuals might connect—in ways that increase one's awareness, content knowledge, cognitive sophistication, and empathic understanding of the complex ways individuals interact within [and change] systems and institutions.
- *Equity (student focus)*: The creation of opportunities for historically underrepresented populations to have equal access to and participate in educational programs that are capable of closing the achievement gaps in student success and completion.

- *Equity (employee focus)*: The creation of opportunities for historically underrepresented populations of employees (faculty *and* staff) to have equal access to professional growth opportunities and resource networks that are capable of closing the demographic disparities in leadership roles in all spheres of institutional functioning.

- *Cultural Competence*: The state of having and applying knowledge and skill in four areas: awareness of one's own cultural worldview; recognition of one's attitudes toward cultural differences; realization of different cultural practices and worldviews; and thoughtfulness in cross-cultural interaction. Over an extended period of time individuals and organizations develop the wisdom and capability to: 1) examine critically how cultural worldviews influence perceptions of power, dominance and inequality; and 2) behave honorably within the complex dynamics of differences and commonalities among humans, groups and systems.
