OLLI Spring 2013 Catalog
Welcome to OLLI at Fresno State

It’s a new year and on behalf of the Osher Lifelong Learning Institute, I’m delighted to announce our Spring schedule of activities. The advisory committee has crafted a wonderful selection that I know you will enjoy.

As in the past, we’ve gathered experts on a wide range of subjects, including science, history, education, and music. You’ll also find opportunities to learn new techniques or improve your current skills in gardening, healthy cooking, painting, writing, and digital photography.

Of course we have several fun field trips planned for you as well! This spring the Fresno OLLI will venture both near (Roger Rocka’s and the Fresno Food Expo) and far (the Getty Museum and the Jelly Belly and Anheuser-Busch factories) to explore, experience, and savor a selection of cultural and educational activities.

Those of you who have been around since the beginning of our Fresno program will recognize Maestro Theodore Kuchar from the Fresno Philharmonic, who spoke at our very first OLLI event back in 2005 and also joined us in 2010. We’re pleased to welcome him as a speaker once again.

We are always interested in hearing from you, our members, about the topics and field trip locations that interest you. Please share your ideas on the evaluation forms at our sessions, or email us at osher@csufresno.edu.

I am looking forward to sharing a fascinating and fun semester with you and OLLI. As always, we appreciate your continued support.

Jeff Sands is the Director of School Development for the Central Valley for the California Charter Schools Association. Service Dogs:
Guide Dogs for the Blind and Search & Rescue

This session will focus on two different aspects of the service dog industry, guide dogs for the blind and Search & Rescue. GDB’s services for the blind begin long before meeting and training with a guide dog, and extend well beyond that training experience. The end goal is to have a partnership that opens doors to new possibilities in life. Jim Russell will walk you through the process from selecting the puppies, to that final moment when they are passed on to their new owners. The second section of the session will cover the dogs of Search & Rescue. Chris Colburn will discuss in detail about the Search & Rescue program; how K9s are used in the program, how they go about choosing the right K9 for the job, and how they are trained for the program.

**WEDNESDAYS:** March 20, 27, & April 3

For example, our hands and limbs are modifications of fins of fishes while our kidneys owe their functioning to fishy adaptations for aquatic life. Session one will cover topics such as evolution as fact & theory, Charles Darwin, and earliest signs of life on earth. Session two will discuss design features of humans and session three will cover topics such as how are bodies work, our “inner ocean,” skin & kidneys.
