*Wednesday, February 10 • 3:30 pm – 5:00 pm*

Satellite Student Union

How is technology creating change in learning styles? People who were born into this High Tech World (Digital Natives) have never known life without a keyboard or a computer. Then, there are people who grew up with a pencil and paper but learned to use the computer (Digital Immigrants). And of course, there are some who still use a typewriter (Digital Dinosaurs). Larry Powell, Fresno County Superintendent of Schools, will share how technology has changed the way people think, work, and learn. It is definitely “not your daddy’s school anymore.”

The dust has yet to clear but we have moved from an unprecedented national debate about health care reform to implementing new policies. While the debate has raged on, California in general and the San Joaquin Valley in particular continue to face a failing health financing approach and an overburdened, underfunded safety net. What happens next? Join local public health expert John Capitman, Ph.D., who has been deeply involved in health reform policy debates as he offers an overview of new policies and explores their implications for our own communities. Capitman is Executive Director for the Central Valley Health Policy Institute and is a professor of Public Health at Fresno State.

The third session is an excursion to Lost Lake Recreation Area to experience this riparian jewel of an ecosystem in our midst. Thinking, Memory and Crime
with Matthew Sharps, Ph.D.

Cognitive abilities change in astonishing ways under hazardous conditions. This is true for victims, eyewitnesses, and law enforcement officers, and a knowledge of how these processes work, and of what they can do, can prove to be enormously important. Professor Matthew Sharps, author of Processing Under Pressure: Stress, Memory, and Decision-Making in Law Enforcement, discusses these critical issues in terms of modern psychology. Sharps demonstrates the ways in which the complex dynamics of attention, memory and decision-making interact with high-stress contexts to make sense of modern forensic realities that seem at first glance to make no sense at all. Sharps is a professor of Psychology at Fresno State, a Diplomate of the American College of Forensic Examiners, and a consultant to the criminal justice system.

What a great year we have had! Thanks to your recruitment of new members, we exceeded 500 members in 2008-09. And, we recently received notification that we are the recipient of a $1 million endowment from the Bernard Osher Foundation.

Yes, the good news is that we received the endowment. However, this means that we will no longer receive the $100,000 annual grant funds from the Osher Foundation. Our operating budget will now be contingent upon the interest accrued on the endowment plus our membership and activity fees.

Those of us who were involved since the beginning and who took a chance on a new idea, knew that it would work. With your continued involvement, the Fresno OLLI will continue to grow and prosper. Let’s continue to learn for learning’s sake.

Shirley Bruegman, Director

“Can’t tell you how much I have enjoyed this series of lectures and look forward to those that follow.”
