

**Research in the Fresno State
Chemistry Department**

by

**Dr. Qiao-Hong Chen, Dr. Jai-Pil Choi,
Dr. Kristina Closser, Dr. Laurent Dejean,
and Dr. Santanu Maitra**

**Friday, January 31, 2020
12 - 12:50 P.M. | AGM-102**

Undergraduate and graduate research is a valuable educational experience available to chemistry students at Fresno State. Research projects provide you with insight into the scientific method, how to solve problems, and a context for what you are learning in their classes. While working on research projects, you will work closely with a faculty member allowing you to establish a working relationship that can be the basis for a more personal and stronger letter of recommendation. Working directly with faculty on research projects will be valuable experience for you when applying for jobs, graduate school, and/or medical school.

Undergraduate and graduate students are encouraged to come learn about getting involved in research.
