

# Graphs

To create a graph in Excel,

- Complete the steps to calculate Frequencies.
- Highlight those frequencies.
- In the top menu line, click on INSERT. Then Click on the icon for the type of graph that you want. I choose a column graph.
- Once you click on a specific graph type, your graph will appear. You will have to copy and move it where you want it.
- By clicking on the numbers on the X-axis, you can change those numbers.
