

## Rebecca Allen – Outstanding Technical Achievement in Energy Efficiency

### Rebecca

- Major: Civil Engineering – Water Resources and Environmental Engineering Option
- Rebecca was born and raised in Fresno, CA where she gained her bachelor’s degree in Anthropology.
- She wishes to focus on the development and retrofitting of wastewater systems for municipalities and believes that our natural resources should be protected and used with respect.
- Upon graduation, she plans on donating her time and skills to Engineers without Borders in hopes of helping bring much-needed infrastructure to impoverished communities and is passionate about supporting local communities' needs for drainage and waste-water treatment.
- She hopes to support and facilitate the building and maintenance of similar systems in Fresno.
- *“This scholarship will support me in my dream to start working as part of an important team helping support connectivity in rural and metropolitan communities.”*
